

Connect Services

Services Overview

Connectivity solutions that bring your business to life.

Communication is the heartbeat of your business. A high-performance, resilient and secure wired and wireless network infrastructure is critical for the collection and communication of all voice, video and data traffic across your business. Without the right infrastructure in place your business simply cannot operate.

In the workplace your employees demand seamless levels of service, with 'always on' connectivity wherever you are, be it the office, the shopfloor or the warehouse.

Your greatest challenge is often understanding the solutions you need to create the environment your business demands; that is where we can assist you.

ENSIGN CAN HELP

Ensign have teams of experienced technology professionals who understand how to design, deploy, secure, and manage your critical network infrastructure, from the core to the edge of the network.

We will work closely with you to ensure we fully understand your business environment and the challenges you face, in order that we create the solution that is most suitable to your technical your budgetary requirements.

Our comprehensive suite of connectivity solutions will help you to drive performance, productivity and efficiency across your business, and with Ensign's skilled engineering teams managing the entire deployment you can be sure you are in safe hands.

KEY BENEFITS

Less hassle - engaging a single partner for all your network and AutoID device needs, saving time and associated cost

A more cohesive deployment as we take the responsibility for managing your end-to-end project

Improved productivity with downtime risks mitigated, which directly impacts your profitability

Reduced total cost - no margin stack which you concede when using multiple support partners

Proven track record - we've been doing this for 30 years
