Leading Integrators*

## AT A GLANCE

Handheld computer & scanning solutions for omni-channel retailers, e-commerce & distribution centres

### EXPERT INTEGRATORS

There is only one word that really matters when building business-critical warehouse & supply chain infrastructure solutions; INTEGRATION.

With so many composite parts, ensuring that they all work together in harmony is where Ensign's difference really sits.

There are many solutions providers who offer one or more of our services and solutions but there aren't many who can integrate them all into one robust, efficient and - above all - reliable system.

### 30 YEARS OF EXPERIENCE

Our business has been around for a long time and the accumulative years of experience within our team is second-to-none.

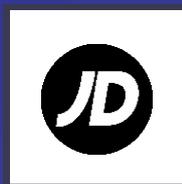

Our vast knowledge and understanding of radio frequency behaviour ensures that we are able to overcome many of the specific challenges presented by the warehousing sector such as expansive metal racking, limited operational space and often harsh environmental conditions.

No matter how tough the RF environment may be, overcoming these obstacles is vital to the delivery of pervasive, secure and resilient WiFi and data capture systems.

### BUSINESS-GRADE TECHNOLOGIES

### PROUD TO WORK WITH

#### Vehicle Mounted Computers

Forming a critical and integral part of any forklift or vehicle-based wireless infrastructure, rugged Vehicle Mounted Computers (VMCs) can be fixed directly into the cab to dramatically improve warehouse and supply chain performance. Built to withstand the rigours of the toughest working environments, these units are shock and vibration resistant and feature a fully ruggedised design.

#### Handheld Terminals

Controlling and managing stock inventory, warehouse logistics and retail Point-of-Sale (POV), Handheld Terminals (HHTs) are available with an array of features to best meet your business requirements.

Handing complete control to the operator, HHTs allow business-critical data to be captured and verified in realtime, reducing errors and costs.

#### Barcode Scanners

Helping to capture data fast and with pin-point accuracy, our ruggedised barcode scanners are designed to work within the most challenging environments. From manufacturing to warehousing and retail applications, Ensign can provide a scanning solution to fit your precise requirements.

#### Mobile Printers

Ensign's rugged portable and fixed-position printers are among the best on the market. Featuring the very latest label and barcode printing technology, these durable printers deliver speed and performance making them suitable for a wide range of enterprise applications.
