Home Worker Solutions

Solution Overview

The COVID-19 pandemic has brought on a global economic recession. For most businesses, continuity is the only option for survival. Our Home Worker packages give you a real solution.

With mass nationwide relocation of employees, from the office to their homes, IT teams have never had a bigger headache, with a need to serve employees with the IT services they need, whilst retaining a high performance, resilient and secure network.

Instantly Productive

Our Home Worker Solution uses Aruba remote access points which are pre-configured, so your employees just plug into any IP connection and they're literally up and running, and with built in security there's no additional time needed from your IT team to set up the solution.

Can You Afford To Wait

Home working is here to stay, fact. Recent Stamford University research suggests Home Workers are in fact 13% more productive, and this additional productivity presents yields additional revenue to the business.

Analysts also anticipate that many business owners will scale down their costly real estate in favour of smaller remote office or home working, therefore the necessity to deploy a secure, scalable Home Working solution is simply a matter of time.

Bundled for Simplicity

With our bundle-plan there is a ready-made solution for every business regardless of size, and to make life easier still, we will pre-configure your devices and ship directly to your offices, so you can bring your remote users online with zero-touch provisioning.

Select the bundle that suits your business requirement, based on the number of employees you need to mobilise, and we can walk you through the rest. Your teams will have access to all the tools they need, just like being in the office.

Maximum Users per package:
