

Mobile Device Management

Solution Overview

Simplify your business mobility platform with a single platform connecting all your mobile devices.

Mobility Equals Success

Business mobility is critical to the success of your company. More and more of your workers depend on mobile devices and apps to do their jobs. But the scale and complexity of your mobility deployment is making security and management more challenging than ever. A challenge that is only going to increase as the Internet of Things (IoT) takes off. **How do you get the right devices into the hands of the right workers and keep them up and running at peak efficiency? How do you simplify app development and deployment while integrating with critical backend systems?**

The era of desktop computing has ended. In its place, mobile technology and IoT devices are taking over, streamlining business operations.

- SoTI MDM Dashboard

Control

Control makes Enterprise Mobility Management (EMM) easier than ever before. It empowers companies to securely manage any device or endpoint with any form-factor and any operating system throughout their entire lifecycle; from deployment to retirement. It controls all aspects of business mobility, from tracking physical assets to managing applications and content, all while keeping devices and data safe and secure.

Assist

Assist is a diagnostic help desk solution that is 'purpose-built' and designed for the mobile-first era. It features award-winning remote-control technology, making it easy and efficient for technicians to analyse, troubleshoot and resolve mobile device and app issues from anywhere at any time. Assist keeps your workers working and your help desk staff stress-free and productive.

Snap

Snap is a cross-platform mobile app development solution built for businesses. It empowers organisations to build the mobile apps they need quickly and cost-efficiently, without the need for specialised resources. Anyone can build an app by dragging and dropping the widgets they need so businesses can prototype, iterate, and deploy apps in minutes or hours, not days or weeks. Snap takes the cost, complexity, and coding out of mobile app development for your business.

Insight

Insight is a business intelligence solution that delivers out-of-the-box analytics on apps, devices, and employee behaviour, making it easy for companies to gain insights into the performance of their mobile operations.

Connect

Connect is an IoT solution built for business, that provides complete lifecycle management of IoT devices within an organisation. Its highly flexible, data-driven architecture means that new IoT devices can be quickly supported and managed, reducing the time to market for IoT initiatives.

Central

Central is an online community for SOTI partners and customers, and makes it easy for customers to connect, communicate and collaborate with product experts and other solutions providers, to get the most out of their mobility and IoT deployments.

Identity

Identity enables simple and secure access to the SOTI ONE Platform suite of solutions. It provides centralised user authentication and role management empowering organisations to create seamless, integrated mobility management workflows.
