

Mobile Device Insight

Solution Overview

As the volume of Mobile Devices continues to increase across your business, the process of maintenance and management of your device estate is becoming more challenging and more time consuming. Without efficient management you are losing valuable time and money, which is impacting your bottom line.

Can You See the Picture

To drive efficiency, through making continuous improvements to your operations, you need to see how your mobile devices are performing. This foresight requires simple, clear, and comprehensive data intelligence.

With Ensign's Mobile Device Insight Solution, you can start to generate business and device performance data, giving you instant and actionable intelligence about your mobile devices – so you can achieve maximum value and performance from your assets and your teams.

- Reduce Device Triage Time Wasted
- Know Where Your Devices Are
- Retain Full Visibility & Control
- Don't Wait for Faults Before You Act

Best in Class Mitigation

Ensign has brought together device visibility foresight, combined with device insight, to create a powerful and fully comprehensive management platform, that business to focus their time and energy on dealing with issues that could cause productivity and profitability challenges **before** they even affect the business in real-time.

Visibility IQ

Receive instant and actionable business data about your mobile devices, so you can maximise the performance and efficiency of your assets and your workforce.

Instant alerts when specific event thresholds are hit so you can resolve issues before they become serious business affecting incidents

Mobile Device Management

Manage your end-to-end device estate from a single view, and leverage innovation to reduce the cost and complexity of business-critical mobility and the IoT.

KEY BENEFITS
