

Network Infrastructure MACs

Service Overview

A constant flow of change in each and every business is critical to ensure operational efficiency and facilitate improved performance. Change is in fact essential to your survival.

At Ensign Communications we recognise the need for change, and most importantly we understand how this can impact your business.

Ensign's **Network Infrastructure Moves, Adds & Changes Service** further enhances our already comprehensive suite of network and mobility services and solutions, ensuring we can support our clients no matter how large, or indeed how small, their infrastructure needs may be.

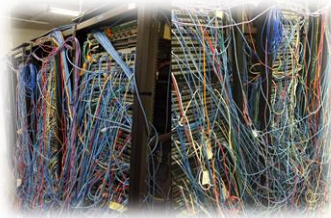

Be Smart

With over 35 years of networking experience, our multi-disciplined 'Smart Hands' engineering teams can quickly, and cost effectively, fulfil your infrastructure requirements.

We can support your needs across everything from simple patching, and floor-box moves, right through to significant office relocation or new build projects.

Ensign's MACs Service includes:

- Racking & Stacking
- Server Room Patching & Labelling
- Telephone Point Relocations
- Comms Room Tidy's
- Wireless Access Point Installations
- Floor Box Moves
- Office Floor Re-Organisations
- UPS Assessments
- On-Site Technical Advice

Comms Room Tidy

Over time Comms Room patching and labelling diminishes making general maintenance impossible. Why not restore it to former glories.

Office Floor Changes

Post COVID return to work requires socially distanced desks and more hot-desking needs, resulting in likely significant changes of current floor boxes and cable runs.

New Wireless AP

The continued increase in IP enabled devices at work means greater bandwidth and coverage is needed. Adding a new Access Point requires cabling infrastructure to bring it onto your network.

KEY BENEFITS

- **Less Pressure on IT Teams to Manage Constant Changes**
- **Reduction in Downtime, Increasing Productivity**
- **Removed Duplicated Labour Costs through Single Partner**
- **Work Assured via a Dedicated Project Leader**
- **Confidence in Selecting a Vastly Experienced Partner**
- **No More Phoning Endless Suppliers, We're Here for You**
