WWW.ENSIGN-NET.CO.UK

Ensign CDI are looking for new 2nd Line Network Engineers to complement our existing technical team to assist with the configuration and support of new and existing customers networking solutions.

The position will be based in our Birmingham or North West England location.

Salary is dependent on experience

The suitable candidates should: -

Desirable:

- be able to demonstrate a good understanding of the ISO model.
- be able to show a good knowledge of different cabling technologies.
- be comfortable working in the CLI console of Aruba(HP) and/or Cisco products.
- be able to configure Aruba(HP) and/or Cisco managed switches.
- have a good understanding of VLANs and how to configure them on Aruba(HP) and/or Cisco managed switches.
- be able to demonstrate a good understanding of the uses of QoS, STP, LACP & LLDP on switches and how to configure them on an Aruba(HP) and/or Cisco managed switch.
- be able to show that they can easily work with IPv4 addresses and subnets.
- Have a base understanding of network routing and dynamic routing protocols
- be able to demonstrate that they can diagnose and resolve configuration and hardware issues on managed layer 2 & layer 3 switches.
- be able to show a good understanding of the most common services and protocols used on local area networks, such as DNS, DHCP, Telnet, SSH, FTP and TFTP.
- have an Aruba ACSA and/or a Cisco CCNA accreditation, or show suitable experience in configuring and fault finding on Aruba(HP) and/or Cisco switching products
- have knowledge and understanding of core networking components (L2 and L3 switches, routers, access points, firewalls)

Beneficial

- be able to show that they can configure Cisco, Cisco-Meraki and/or Aruba wireless products.
- have experience configuring and fault finding on point-to-point wireless equipment.
- be able to demonstrate a good understanding of network resiliency in layer 2 and layer 3 network devices.
- be able to demonstrate the ability to configure Cisco routers.
- have experience working on Next Generation Firewalls, particularly on: -
 - o Palo Alto NG firewalls; and/or
 - o Cisco ASA-X firewalls; and/or
 - o Cisco Firepower firewall appliances.
- be able to show the ability to configure Site-to-Site and remote user VPN tunnels on Cisco and/or Palo Alto devices.
- have experience in configuring 802.1x on Aruba(HP) and/or Cisco managed switches.
- have experience in provisioning and diagnosing faults on DSL and Ethernet WAN circuits.
- have experience with provisioning and configuring tenant and/or cloud based VoIP solutions.
- have experience in carrying out RF WLAN surveying
- have an Aruba ACSP and/or a Cisco CCNP accreditation.

If you believe you can fulfill this position, then do not hesitate to apply today.
