

STILL UNSURE?

PRE-WAAS CONSIDERATIONS

WiFi as a Service (WaaS)

Your Business. Connected.

If you are considering WaaS for business, but are still unsure; answering the following questions may help.

CONSIDERATIONS...

Before embarking on your WiFi as a Service journey, there are a few things to consider which might help you to understand how you and your business can get the most out of fully managed wireless.

- 1.** Do your customers require WiFi or does your current customer WiFi generate a poor user experience?
- 2.** Does your current WiFi facilitate simplified guest login and branded splash pages?
- 3.** Could your business benefit from a more 'intelligent' approach to guest login and data capture?
- 4.** Are you or your IT staff currently tasked with manually setting guest and employee logins?
- 5.** Do your employees and/or guests require connectivity for high-bandwidth applications such HD video streaming?
- 6.** Do you have a contingency plan should your network unexpectedly suffer an outage?
- 7.** How much are you currently spending on IT servicing and how much predictability is built in to your annual IT expenditure?

Talk to us about WaaS...
