

Smart Worker

Solution Overview

Optimising workforce productivity has never been more critical on the back of the challenging economic and environmental impacts experienced in 2020.

With a continued migration of employees from the office to their homes, Smart Worker presents your business with an easy-to-use solution, ensuring all remote users can connect to the corporate network, with secure policy and access build in negating the need for extra layers of security.

Instantly Productive

Smart Worker Solution uses Aruba remote access points which are pre-configured, so your employees simply plug into any IP connection and they're instantly up and running. With built in security there's no additional time needed from your IT team to set up the solution.

Can You Afford To Wait

Home working is here to stay, fact. 2020 Stamford University research suggests **Home Workers are up to 13% more productive**, and enhanced productivity presents itself as increased revenue to your business.

Analysts anticipate the future will see many business owners scaling back their costly real estate in favour of smaller remote office and home working, therefore the necessity to deploy a secure, scalable Smart Worker solution is simply a matter of time for most businesses.

Bundled for Simplicity

With our bundle-plan there is a ready-made solution for every business regardless of size, and to make life easier still, we will pre-configure your devices and ship directly to your offices, so you can bring your remote users online with zero-touch provisioning.

Select the bundle that suits your business requirement, based on the number of employees you need to mobilise, and we can walk you through the rest. Your teams will have access to all the tools they need, just like being in the office.

Maximum Users per package:

Small Bundle 64 users

Medium Bundle 256 users

Large Bundle 512 users

Enterprise Bundle 1,024 users
